

Nome:

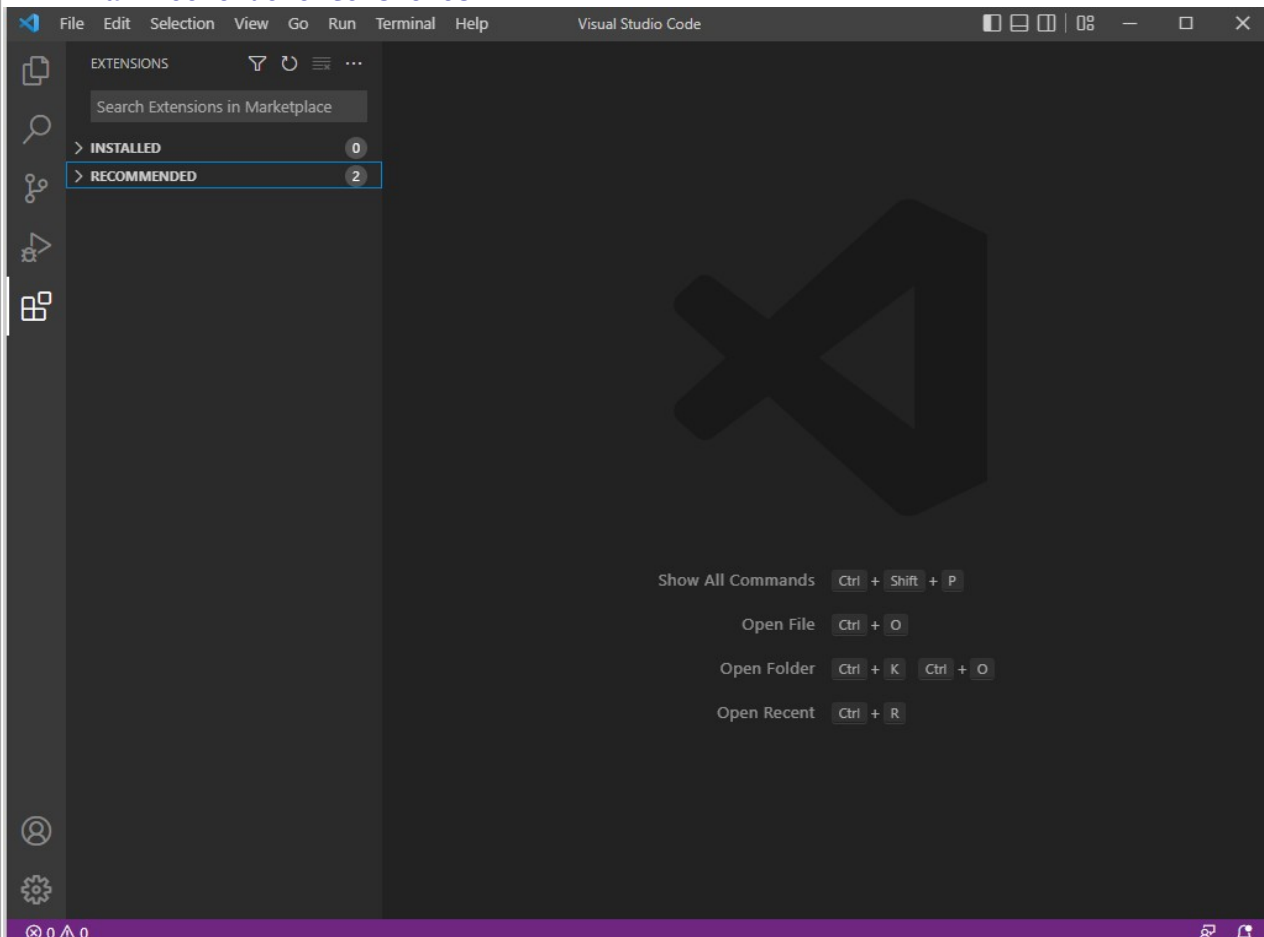

2.17 Instala as seguintes extensións en Visual Studio Code:

- Spanish Language Pack for Visual Studio Code
- HTML CSS Support
- HTML Snippets
- HTML Preview
- Open in browser

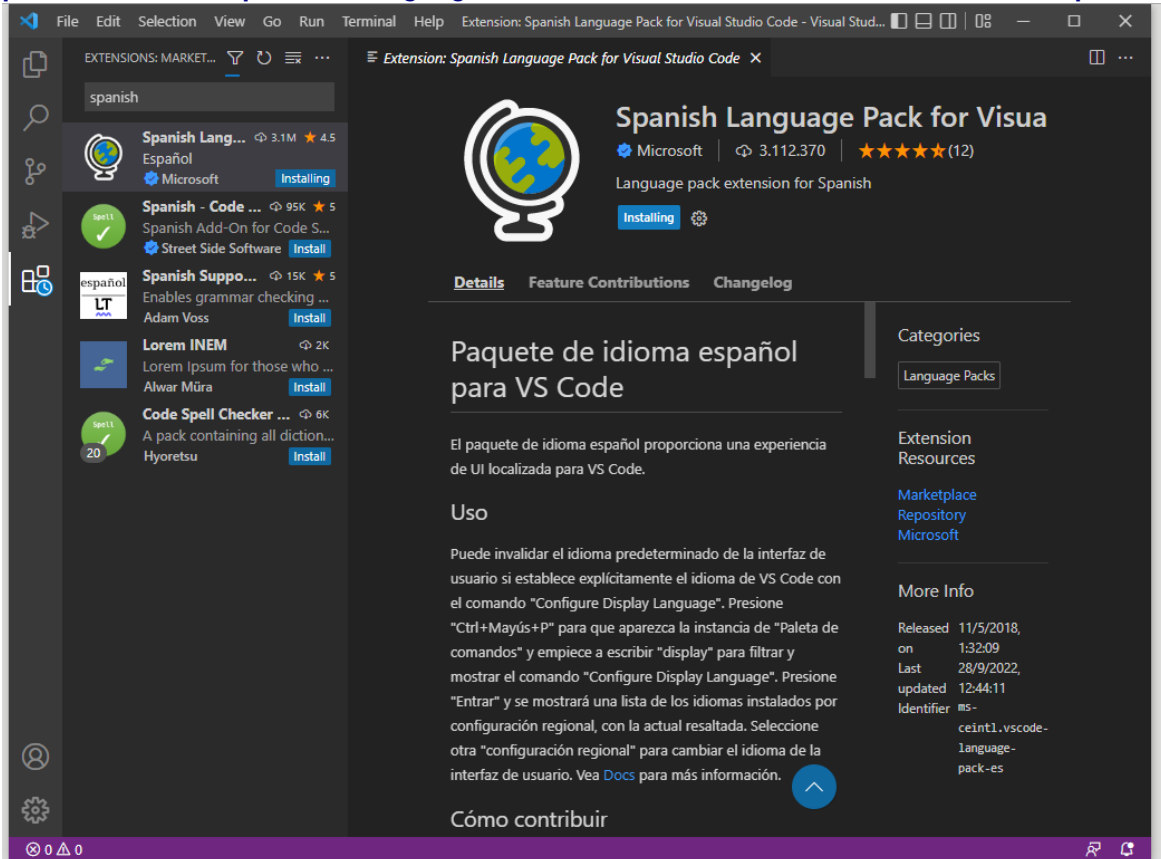

Describe os pasos de instalación de cada un deles e inclúe as capturas de pantalla correspondentes. Ademais, indica para que serve cada un deles e mostra o seu funcionamento, incluíndo capturas de pantalla.

Resposta

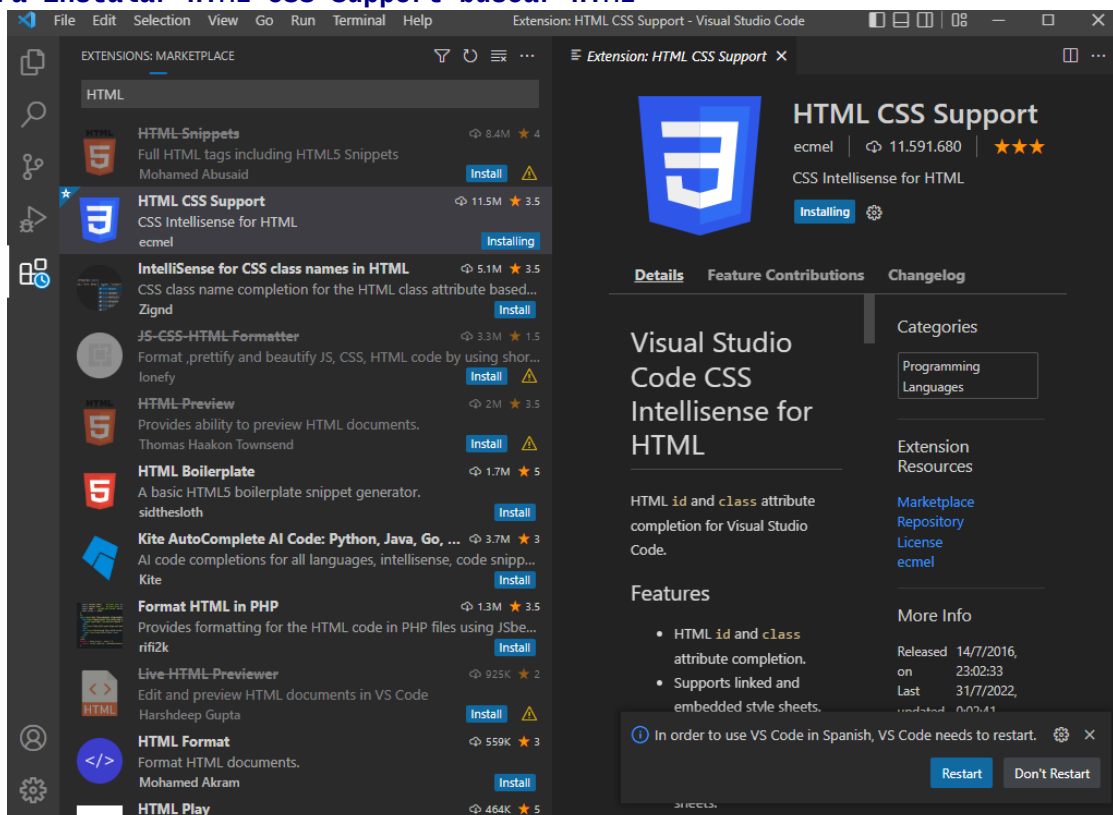

1º ir al icono de extensiones

2º para instalar Spanish Language Pack for Visual Studio Code buscar spanish

despues de instalarlo reiniciar visual studio code 3º para instalar HTML CSS Support buscar HTML

4º para instalar HTML Snippets buscar HTML

The screenshot shows the Visual Studio Code interface with the 'EXTENSIONS: MARKETPLACE' sidebar on the left. The search bar contains 'HTML'. The list of extensions includes 'HTML Snippets' by Mohamed Abusaid, which is highlighted. The main panel displays the details for 'HTML Snippets v0.2.1'. The extension is marked as deprecated with a warning icon and the message: 'This extension is deprecated as it is no longer being maintained.' The 'README' section states: 'Visual Studio Code HTML Snippets' and 'DISABLING THIS EXTENSION AS IT CURRENTLY CONFLICTS WITH EXISTING VS CODE HTML EXTENSION'. A notification at the bottom says: 'In order to use VS Code in Spanish, VS Code needs to restart.' with 'Restart' and 'Don't Restart' buttons.

5º para instalar HTML Preview buscar HTML

The screenshot shows the Visual Studio Code interface with the 'EXTENSIONS: MARKETPLACE' sidebar on the left. The search bar contains 'HTML'. The list of extensions includes 'HTML Preview' by Thomas Haakon Townsend, which is highlighted. The main panel displays the details for 'HTML Preview v0.2.5'. The extension is marked as 'Installing'. The 'README' section states: 'An extension to preview HTML files while editing them in VSCode' and 'The extension can be activated in two ways'. The activation methods are: 'Toggle Preview - ctrl+shift+v or cmd+shift+v' and 'Open Preview to the Side - ctrl+k v or cmd+k v'. A notification at the bottom says: 'In order to use VS Code in Spanish, VS Code needs to restart.' with 'Restart' and 'Don't Restart' buttons.

6º para instalar Open in browser buscar open

The screenshot shows the Visual Studio Code interface with the 'EXTENSIONS: MARKETPLACE' sidebar on the left and the 'Extension: open in browser' details panel on the right. The sidebar lists several extensions, with 'open in browser' by TechER highlighted. The details panel shows the extension's icon, name, version (v2.0), publisher (TechER), download count (6,446,696), and rating (3 stars). It also includes a description, 'This allows you to open the current...', and an 'Installing' button. Below the details, there are tabs for 'Details', 'Feature Contributions', and 'Changelog'. The 'Details' tab is active, showing a 'What's new?' section with bullet points: 'rewrite the code with TypeScript, now it depends on a tiny library npm/opn', 'support more browsers: Chromium(Mac only), Firefox Developer Edition(Mac only), Edge(Windows only), sometimes it won't work', and 'you can open any type of file with the default'. On the right side of the details panel, there are sections for 'Categories' (Other), 'Extension Resources' (Marketplace, Repository, TechER), and 'More Info' (Released 27/12/2016, on 11:56:07, Last 12/8/2018, updated 6:53:37, Identifier tech.er.open-in-browser). At the bottom of the details panel, there is a notification: 'In order to use VS Code in Spanish, VS Code needs to restart.' with 'Restart' and 'Don't Restart' buttons.
